Sprint:	SA - Sprint 5: Development

Description[FIGMA LINK](#)**Rationale**

- Amazon Approval requires to make 3 qualified sales before any verifications will be done.
- To make those sales I can ask my friends to buy stuff though my affiliate links, but they still need click on the link from a website.

Acceptance criteria

1. Create a static Top Deals Page
2. Display multiple sections for different types of products
3. In each section display 3 product cards:
 1. Image
 2. Name
 3. Price

Technical approach

1. Page url /top-deals
2. Whole product card must be a link

Christmas Gift for Sister

6561ebbc9809ead04566326e

Christmas Gift for Sister

she's interested in digital painting

- Does she have a preference for any specific digital painting software or artists that she admires? Would she prefer a drawing tablet that can connect to a computer, or a standalone tablet with a screen?

she would like a drawing tablet

it would be her first one, it shouldn't be more than 300 dollars

- What type of drawing does she like to do (characters, landscapes, abstract)? Would she prefer a pen display tablet where she can see her art on the tablet itself, or a pen tablet without a screen which is often more budget-friendly?

a pen display tablet where she can see her art on the tablet itself sounds good

Since you are looking for a pen display tablet for your sister who is interested in digital art and it's her first one, I will suggest a few options that are user-friendly and within your budget of \$300.

I would also like it to be white colored

{
    Text = dto.FirstMessageText,
    Role = MessageRoles.User.ToString(),
    CreatedById = (ObjectId) GlobalUser.Id,
    CreatedDateUtc = DateTime.UtcNow,
    WishlistId = createdWishlist.Id
};
var createdMessage = await _messagesRepository.AddAsync(newMessage, cancellationToken);
```

Here change role to Assistant

Also, fix role to Assistant here:

8 references |  3/3 passing

```
public async Task<MessageDto> AddMessageToPersonalWishlistA
{
    var newMessage = _mapper.Map<Message>(dto);

    if (!ObjectId.TryParse(wishlistId, out var wishlistObjec
    {
        throw new InvalidDataException("Provided id is inva
    }

    newMessage.Role = MessageRoles.User.ToString();
    newMessage.CreatedById = (ObjectId) GlobalUser.Id;
    newMessage.CreatedDateUtc = DateTime.UtcNow;
    newMessage.WishlistId = wishlistObjectId;
}
```

Amazon Approval (SA-2)

[\[SA-148\] Add method for retrieving SSE](#) Created: 05/Nov/23 Updated: 12/Nov/23 Resolved: 09/Nov/23

Status:	Done
Project:	Shopping Assistant
Components:	None
Affects versions:	None
Fix versions:	None
Parent:	Amazon Approval

Type:	Development Task	Priority:	Medium

Story point estimate:	5
Sprint:	SA - Sprint 3: Development

Description

As a shopping assistant developer I want to be able to communicate with back-end API using separate service fitted for that.

Acceptance criteria

- Create logic to handle authorization
 - Add guest login logic
 - Store `jwt` in local storage
 - Add `accessToken` to each request
 - Add logic to refresh tokens
 - Add singleton global user to pull personal data (see iOS example if needed)
- Create methods:
 - to send Queries to GraphQL endpoint
 - to send Mutations to GraphQL endpoint
 - to get SSE
 - using `POST` method

Technical Approach

Description

Based on provided documentation and diagrams in Project pages fill out Vision and Scope Documentation.

During weekly meeting on Sunday, October 1 document will be reviewed and finalized by the team. All tasks must be done prior to this.

Individual tasks

See example in attachments.

- [Serhii Shchoholiev](#) Leave comments/stub out the documentation to provide context for other members of the team.
- [Polina Pavlenko](#) [1 - 2.3] sections
- [Stanislav](#) [2.4 - 3.2] fill out [1-2] functional requirements (first two)
- [Mykyta Dubovyj](#) 3.2 - fill out [3-8] Functional requirements
- [Andrii Syrotenko](#) [3.2 - 3.3] fill out [9-10] Functional requirements
- [Taras Bondarenko](#) [3.4 - 3.7]
- [Danylo Nazarko](#) [3.8 - 4.2]
- [Mykhailo Bilodid](#) After everyone is done with their tasks for Vision and Scope Document, review whole document, change formatting, add missing data and if needed ask others to make the changes.

Description

As a Shopping Assistant user I want to be able to view products that I liked.

Acceptance criteria

- 1. Add ability to view personal wishlists
- 2. Add ability to add product to wishlist
- 3. Add ability to view products in wishlist
- 4. Add ability to open search chat
- 5. Add ability to delete wishlist

Technical Approach

- 1. Do not delete anything from DB, set **isDeleted** to true

Testing Approach

Description

As a Shopping Assistant user I want to be able to search for gifts using natural language.

Acceptance criteria

1. Add search type "Gift"
2. Add ability to start new search
3. Ask user set of questions before starting the search
4. Send questions to user to narrow the search if needed
 1. Give user suggestion on answers
5. Return products as a list of names

Technical Approach

1. Test workflow through ChatGPT and do prompt engineering

Testing Approach

1. Do not compare content of the search result as they can be different every time due to dependency on Generative AI

Notes

- (!)Product cards are out of scope for this task

Sprint:	SA - Sprint 3: Development

Description

As a Shopping Assistant user I want to be able to search for products using natural language.

Acceptance criteria

- Add search type "Product"
- Add ability to start new search
 - Accept message and return answer with new wishlist
- Send questions to user to narrow the search if needed
 - Give user suggestion on answers
- Return products list

Technical Approach

- Test workflow through ChatGPT and do prompt engineering
- Save only product name in Products Collection because we have no access to Amazon API
- Return SSE (server-sent-events) with different types:
 - message** - return MessagePart - realtime message split into tokens
 - suggestion** - return Suggestion - suggestions for answers to questions
 - product** - return ProductDto - result of the search (only product name as we dont have Amazon API access)
- See attached Confluence pages for detailed docs

Testing Approach

- Do not compare content of the search result as they can be different every time due to dependency on Generative AI

Notes

- Product cards should be simple, without JS animations

Status:	Done
